	RU	TL0697-LI0003800 >>>
	CN	TL0692-KI0002591 >>>

Upgrade procedure:

1. Place the "Harman_G15.HUI" file into the root directory of an empty USB-stick.
2. Connect the Partybox to mains power.
3. Power ON the Partybox.
4. Insert the USB-stick into the USB socket placed on the rear side of the Partybox.
5. Press the Volume+ & Bluetooth buttons simultaneously for more than 10 seconds. The unit enters DFU mode and begins the upgrade (All panel LEDs show white constant light).
6. About 7 minutes later, the unit upgrade is complete. The unit may automatic restart after upgrade is completed.

Software check/pronounce:

In power ON mode press the Volume- & Bass-boost buttons simultaneously for more than 2 seconds. The unit pronounces software version by voice (38 12 21)
